Re: Application for Webdesigner at Ridah's Soulutions GmbH

Dear Mr Rida Hemmo,

I'm excited to apply for the Webdesigner role at Ridahs Soulutions GmbH. With a background in both creative and technical problem-solving—from full-stack web development to data visualization—I'm eager to bring my skills and entrepreneurial spirit to your growing team.

In my most recent projects, I've independently designed and launched websites for nonprofits and small businesses, including the Sarah Zuber Scholarship Foundation and CleanWorksNW. I worked closely with clients to translate their ideas into intuitive, visually appealing, and fully functional sites. My stack includes HTML/CSS, JavaScript, Node.js, Express, and MongoDB, with experience integrating tools like Stripe, SendGrid, and Facebook APIs. I value clean design, responsive layouts, and seamless user experiences.

Before transitioning to web development, I worked as an IT Business Analyst, where I created a company-wide intranet and designed a Jira-based ticketing system for streamlining external IT requests. This blend of technical precision and user-centric thinking continues to shape how I approach every project.

What excites me most about Ridahs Soulutions is your commitment to innovation and collaboration. I thrive in dynamic, fast-paced environments and am eager to contribute not just as a developer, but as a creative partner who helps shape meaningful digital experiences. I'm also comfortable working independently and value the flexibility and entrepreneurial mindset your team promotes.

Please find my CV and portfolio attached. I'd be thrilled to share more about my work and hear how I can contribute to your mission.

Warm regards,
Aaliyah Hänni
